

**Readme file for replicating the estimation results in “Deep Habits in the New Keynesian Phillips Curve” (JMCB), by Thomas A. Lubik and Wing Leong Teo**

The replication folder consists of two files: “deep\_habit\_nkpc\_workfile” and “deep\_habit\_nkpc\_program” .

The data for estimation are stored in Eviews workfile “deep\_habit\_nkpc\_workfile”. The program file “deep\_habit\_nkpc\_program” executes the estimation in the paper. These programs are written in Eviews version 7.
